Polish Geology facing future challenges

All Earth Science community members, both from academia and industry, are cordially invited to participate in the **3rd Polish Geological Congress** to be held from **14 to 18 September, 2016**, in Wrocław, Poland (14 to 16 September – indoor sessions, 17-18 September – field excursions).

The Congress topics comprise a wide spectrum of problems related to Earth's composition and structure, to exploring and exploiting its resources and to geological aspects of the environment. We do hope the Congress will become an excellent opportunity for a comprehensive review of achievements of the Polish geology in the context of the world-wide background.

The 3rd Polish Geological Congress is organized by the Polish Geological Society, Wrocław Division, together with the University of Wrocław, Wrocław University of Science and Technology, Wrocław University of Environmental and Life Sciences and the Polish Geological Institute – National Research Institute. All the information concerning the Congress is available at <http://www.3pkg.pl>. The correspondence should be addressed to: kontakt@3pkg.pl or ptg@uwr.edu.pl

ON-LINE Registration
